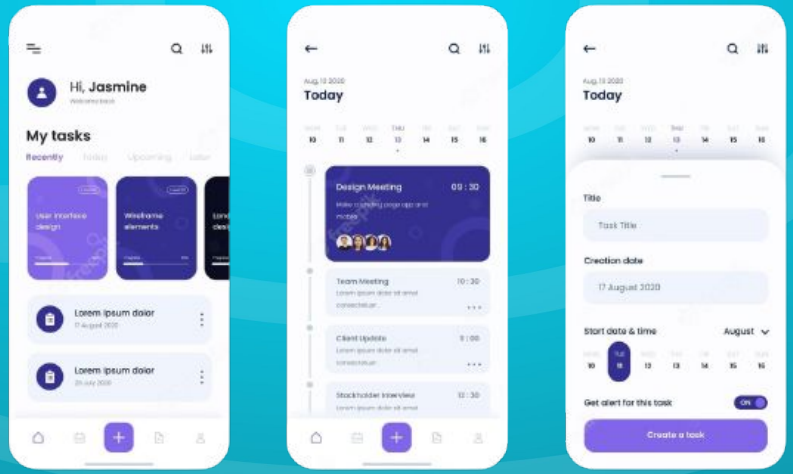
Introducing the LNA Community Mobile Application

Rami Harfoush
13/9/2023

Introduction

Welcome to our presentation. Today, we are excited to introduce a proposal for a mobile application that will revolutionize communication and collaboration within the LNA Community.



Project Overview

Our proposal revolves around developing a mobile application designed to enhance productivity and communication within the LNA Community. This application will seamlessly integrate with your existing website, offering an enhanced user experience and improved collaboration.

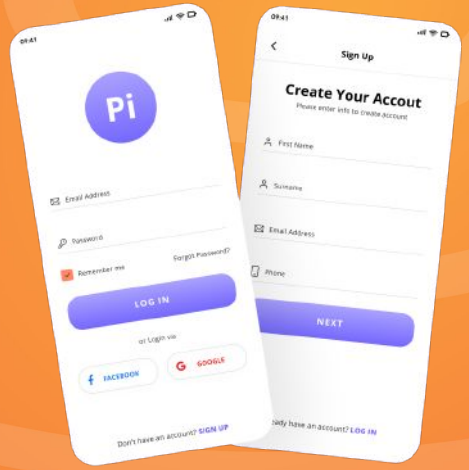
The purpose of this application is to provide a seamless and efficient platform for internal communication, file sharing, project management, meeting scheduling, group chat, public announcements, member profiles, and notifications.

Application Business Flow

Let's dive into the core functionality of our proposed mobile application. It will follow a logical flow, providing a user-friendly experience for all community members. Here's an overview of the key features it offers:

User Registration and Login

Users can easily register and log in to the application, creating personalized accounts with their essential details, such as name, email, phone number, and profile image.

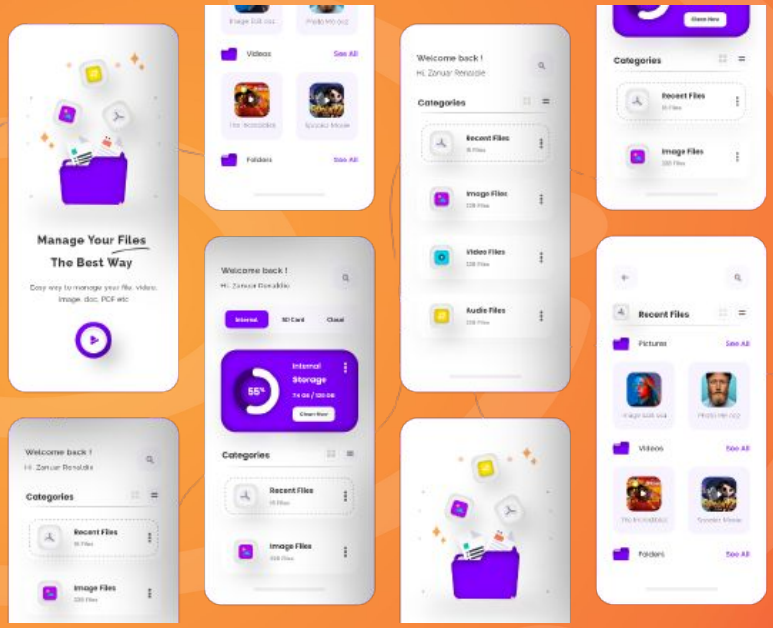


Dashboard

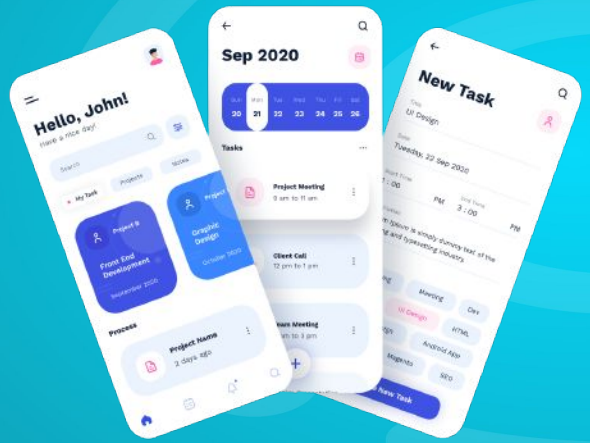
Upon logging in, members will access a personalized dashboard, serving as their central hub for accessing various features and information within the application.

File Manager

Our app includes a robust file manager where members can efficiently share files and folders with one another. Admins have additional privileges for folder management.



Projects and Milestones



In the application, a dedicated section allows members to manage projects, view project details, create new projects, and track project milestones and progress.

Meeting Calendar

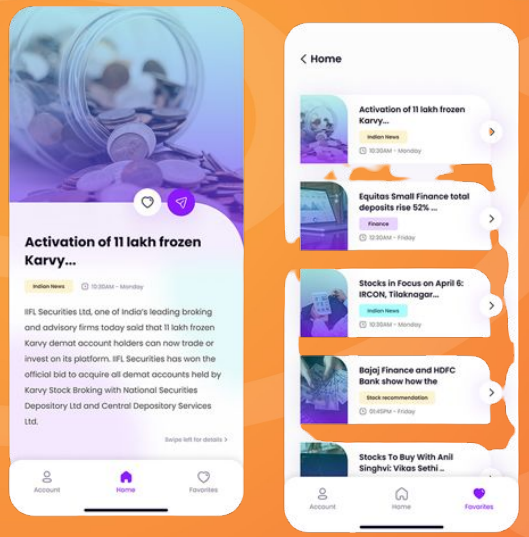
We'll integrate a comprehensive meeting calendar, enabling members to create, explore, and attend meetings. The app sends timely reminders and allows calendar integration for convenience.

Real-time Chat Room

Our app offers a real-time chat feature, facilitating instant communication among community members. Users can create chat groups, share various media, and documents within the chat room.

Public Announcements

Admins can publish public announcements, ensuring all users receive timely notifications for important updates.

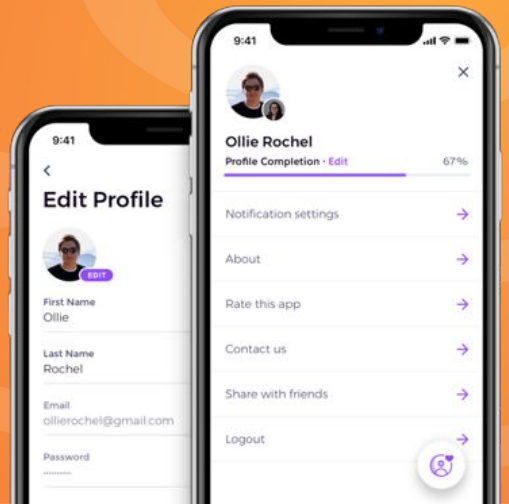


Posts and Polls

Members can engage with posts and polls, encouraging active participation and interaction within the community. Publishers and admins have control over post management.

User Profile

Each member has a customizable user profile section, displaying essential information like their profile image, name, email, phone number, and member category. Users can update their profiles as needed.



Member Directory

Our application includes a comprehensive member directory that simplifies networking by categorizing members, providing sub-categories, and displaying profile information for easy access.

Notification Center

A dedicated notification center consolidates announcements and voting-related notifications, offering users effective filtering options for managing their notifications.

Development Phases

The development of this project will occur in several phases to ensure a successful launch:

- Project Planning and Requirements Gathering
- UI/UX Template Design and Wireframing
- Front-end Development
- Back-end Development and API Integration
- Testing and Quality Assurance
- Deployment and Launch

Benefits of the Mobile Application

The LNA Community Mobile Application brings several key benefits:

- Enhanced communication and collaboration.
- Streamlined project management.
- Simplified meeting scheduling.
- Real-time chat for instant communication.
- Efficient announcement distribution.
- Enhanced user profiles and networking.

Next Steps

Moving forward, the next steps in this project involve development and implementation. We are committed to ensuring the success of this endeavor and look forward to your input and collaboration.

Q&A

We'll now open the floor to any questions or comments you may have.

Conclusion

In conclusion, we've presented a powerful proposal for a mobile application that will transform the LNA Community. We're excited about its potential impact and look forward to making this project a reality.

Thank you!!
